Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claims 1-3 are objected to because of the following informalities: there is an inconsistency between the language in the preamble and certain portions in the body of the claim, thereby making the scope of the claim unclear. Applicant is required to clarify what the claim is intended to be drawn to i.e., either the base structure alone or the combination of base structure and clothes dryer, and the language of the claim be consistent with the intent.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fig. 3 of applicant's admitted prior art in view of Shanks (u. S. pat. 1,491,555).

Fig. 3 of applicant's admitted prior art shows a clothes dryer same as claimed except for a plurality of air holes in a base in a front area of an inlet side of a mixing pipe. Shanks teaches a clothes dryer with a base 10 having a plurality of air holes 22 in a front area of an inlet side of a mixing pipe (not numbered, see Fig. 4). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the base of the clothes

dryer of Fig. 3 of applicant's admitted prior art with a plurality of air holes as taught by Shanks in order to improve the drying efficiency.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fig. 3 of applicant's admitted prior art in view of Shanks (u. S. pat. 1,491,555) as applied to claims 1 and 2 above, and further in view of Schenck (U. S. Pat. 1,799,649).

The clothes dryer of Fig. 3 of applicant's admitted prior art as modified by Shanks as above includes all that is recited in claim 3 except for the shape of the air holes. Schenck teaches a clothes dryer with long air holes 8a same as claimed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify the clothes dryer of Figs. Of applicant's admitted prior art to include long air holes as taught by Schenck in order to improve the drying efficiency.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lemme et al. (U. S. Pat. 6,036,988) shows a dryer with base having air holes. Fowler (U. S. Pat. 2,681,513) shows a clothes drier with base having air inlet holes.
